System to Be Tested on Buffalo-Chicago Special Saturday.

The most important experiment in American railroading in years will be undertaken Saturday morning between Buffalo and Chicago, under the auspices of Frederic Thompson, the Lake Shore Railway and the Marconi Wireless Telegraph Company of America.

On that date Mr. Thompson will take two of his theatrical companies, "Via Wireless" and Miss Mabel Taliaferro's "Polly of the Circus," to Chicago on a special train, which because of its proportions and speed will be known as the

This train will be equipped with Marconi wireless instruments, in charge of G Schaefer, who until this week has been the Marconi operator on the North German Lloyd liner Kaiser Withelm II. Never before has there been an attempt made to transmit and receive messages by wireless on a moving train. Arrangements have been made to make this experiment perfect, for every one connected with it believes it will be history-making in importance. making in importance.

DAVENPORT ON BEDOUINS.

Homer Davenport, the cartoonist, gave what he called a "picture talk" at the Carnegie Lyceum last night to a large audience, his subject being "My Bed-ouin Brother." Mr. Davemport lifus-trated his lecture with stereopticon pic-tures, and talked very interestingly about the Arabs he had known, and their customs.

He also had a good word to say about the Arablan horse, three specimens of the Arabian horse, three specimens of which he has had presented to him and which he keeps on his farm.
